**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

1. Applicant's election of claims 39-43 in the reply filed on 06/04/2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 39-43 are rejected under 35 U.S.C. 102(b) as being anticipated by Gonser (U.S. Patent number 4,112,335 cited by Applicant).

Regarding claim 39, Gonser discloses a flashing UV lamp (Figs 1 and 2), comprising a xenon flash tube (30), a trigger circuitry means (33) for obtaining an adjustable or a preset flash rate, and a filter glass (27) (Figs. 1 and 2; col. 3, lines 10-25; col. 4, lines 1-45; col. 5, lines 10-20).

Regarding claim 40, Gonser discloses the flashing UV lamp wherein the xenon flash tube (30) filled with a xenon gas mixture at a pressure less than about 4 atmospheres (Figs. 1 and 2; col. 4, lines 30-40).

Art Unit: 2821

Regarding claim 41, Gonser discloses the flashing lamp wherein the xenon flash tube comprises an UV flash pulse circuit Figs. 1-4).

Regarding claim 43, Gonser discloses the flashing lamp wherein the filter directly to the xenon flash tube (Figs. 1 and 2).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 42 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gonser (U.S. Patent number 4,112,335).

Regarding claim 42, Gonser does not teach the flashing lamp with the plash rate from about 4 flashes per second to about 1 flash every four seconds. However, it would have been obvious to one having ordinary skill in the art to preset the flashing lamp of Gonser with the flash rate as claimed in the present invention, since it has been held to be within the general skill of a worker in the art to set up the rate as of flashing lamp as a matter of obvious engineering design choice.
